

## DGMD E-28

### Developing Single Page Web Applications

# Assignment 1: Simple Web Page on GitHub

#### Due Date

February 2 at 9pm EST

#### Summary

Your assignment is to create a single web page and deploy it on GitHub.com

#### Requirements

The page must include the following information:

- Your name

- Where you are from

- Your major

- 2 - 3 sentences describing your web development background

- An image that represents your favorite place

- A link to your favorite restaurant

- A form that asks the user to subscribe to your newsletter - it should have a place to enter first and last name, email, and a checkbox that acknowledges permission to be added to the list.

- You do not have to perform any validation - just present the form.

Use CSS to add styling to the page

#### Deliverables:

URL of the website live on github.com

#### Rubric

20 points	Creativity & Effort
60 points	Meets requirements
20 points	Overall quality/technical proficiency
